---

## Experience

---

### Freelance / Software Developer

JULY 2019 - PRESENT, REMOTE

I help individuals and clients devise scalable and efficient software solutions for their business needs and ideas thus improving their online presence. These include but not limited to Website creation, Website design and architecture using the client's preferred technology stack, SEO

### Koyaro Center / Web Developer

SEPTEMBER 2019 - OCTOBER 2019, NAIROBI

Koyaro center specialized and build apps in: Python - Django & Flask and JavaScript - JQuery & Angular, I design markups using HTML5 and aestheticize using CSS3, Bootstrap4 and MDBBootstrap, I make structured query language using Postgres-SQL, MySQL, SQL and SQLite.r is a real estate company situated in Nairobi in the slums of Kibera. I was contracted to work on a website that would give it a good online presence and enhance its management as well. In a team of three I was the scrum master responsible for both front-end and back-end development as well as planning the spirits. We successfully delivered the project in two weeks.

Stack: Python-Django, HTML5, CSS3

### National Aids Control Commision (NACC) / Data Clerk

AUGUST 2018 - OCTOBER 2018, MOMBASA

Organized the data collected from the coast region and prepared them

into excel presentations before entering them into the Health Information System Kenya (HISKenya).

I was tasked with clearing a backlog that had accumulated for six months, it would require four months to complete, but it took me three weeks to clear the backlog and the office was able to meet the deadline and present the report in time to the central headquarters.

---
